WEEK 11 · THE BUNKER

Escape the Sand.

> *You don't hit the ball out of a bunker — you hit the* ***sand****, and the sand throws the ball out. Missing the ball on purpose is the whole shot.*

THE SWING · TOP TO FINISH

1. **Set the wrists early — up steep.** — Hinge the wrists early so the club swings **up steep and upright**, ready to drop down into the sand behind the ball.
2. **Splash under it — face to the sky.** — Slide the club **through the sand under the ball**, keep the face open, take a thin slice, and keep accelerating.
3. **Belt buckle to the target.** — Finish **tall and balanced**, belt to the target. Never quit at the ball — that's what leaves it in.

SET UP TO ESCAPE

1. **Dig in, open the face.** — Feet worked into the sand, stance a touch wider, clubface **slightly open** so it slides instead of digging.
2. **Quiet legs — no sway.** — Lower body stays stable; **turn around a steady centre** so the bottom of your swing doesn't move.
3. **Aim at the sand behind it.** — Splash a spot **a couple inches behind** the ball, and keep your eyes right on that spot.

PRACTICE · TWO DRILLS + A GAME

1. **Draw the Line.** — No ball. Enter **behind** a line, exit **in front**, splash to a full finish. Trains your low point.
2. **Dollar Bill.** — Splash out a whole "bill" from under the ball. Trains a **shallow, even slice** of sand.
3. **Bunker Confidence Drill.** — Drop 10 balls; get **5 out onto the green**, counting your tries. Play again and beat your number.

Two courtesies: *step in and out from the low side, and rake your tracks when you're done.*
